**Short description:** Insurance Restoration Works

---

Escape of water – bathroom leak

The customer has suffered a leak from the bath which had caused damage to the floor in the bathroom and also affected the walls.

Following the strip out and conclusion of the drying works at the house we reinstated the bathroom floor with new.

We then plastered all the walls and then reinstated the bath.

The walls and floors were then tiled and the remainder of the suite installed to conclude the works.

We also carried out decorations to the kitchen below which was affected by water staining.
