Fire damaged property

The 3 bedroom semi detached 1920s property suffered substantial fire damage throughout including damage to the ground and first floor structures, lintels and plasterwork.

After stripping out all the damaged items and reinstating new floor joists, floor boards and door linings we were able to undertake the electrical, plumbing and heating works in the house.

We then plastered the walls and ceilings and installed a new kitchen and bathroom.

The tiling works then took place followed by second fix joinery and decorations to completion.
